LMQ-S Project Report

Introduction

This report is an overview of different educational and developmental activities within Nakhchivan State University under the LMQ-S project. The purpose of the LMQ-S project involves multiple approaches to improving a students' knowledge about health care. This report presents main events, including “Healthy Camp” project, risk management training in health care system, quality assurance training in healthcare services and creation of a new specialty in healthcare management. These programs provided a foundation for preparing future professionals who will excel in their careers and make significant contributions towards improvement of health sector.

Healthy Camp Project at Batabat

The students' visit to Batabat was organized as part of the "Healthy Camp" project, facilitated by the Student Trade Union Committee in collaboration with the Faculty of Medicine. The visit commenced with an introduction to the flora and fauna of Zangezur National Park, located in the Shahbuz region. Following this, a training session focused on researching and studying medicinal plants around Batabat Lake was conducted. Subsequently, medical faculty students led training sessions on various first aid procedures, including:

- First aid in case of clinical death
- First aid for suffocation due to a foreign body
- First aid for shock and coma

During these sessions, participants' questions were addressed comprehensively. Additional training sessions covering topics such as:

- First aid for bleeding
- First aid for poisoning
- First aid for burns
- First aid for fractures, sprains, and dislocations were also conducted.

Risk Management Training at Nakhchivan State University

Training on Risk Management in Healthcare Conducted for Medical Faculty Students at Nakhchivan State University

In an effort to enhance the knowledge and skills of future healthcare professionals, the Faculty of Medicine at Nakhchivan State University recently organized a comprehensive training session on risk management in healthcare. This initiative is part of the LMQ-S project and the university's ongoing commitment to ensure high standards of education and practical preparedness among its students. The training, conducted by experts in the field, covered a wide range of topics essential for effective risk management in healthcare settings. Key areas of focus included:

“

- Identifying and Assessing Risks: Students were introduced to various methods for identifying potential risks in healthcare environments and assessing their impact on patient safety and healthcare delivery.
- Preventive Strategies: The session emphasized the importance of preventive measures and proactive strategies to mitigate risks before they escalate into serious issues.
- Crisis Management: Practical guidance on managing crises, including handling unexpected events and emergencies in a healthcare setting, was provided to equip students with the skills needed for swift and effective response.

The training received positive feedback from the students, who appreciated the practical insights and hands-on approach. Nakhchivan State University remains committed to offering such impactful training programs, ensuring that its students are well-prepared to meet the challenges of the healthcare sector and contribute positively to the community.

Quality Assurance Training

As part of the LMQ-S Erasmus+ project, the Faculty of Medicine at Nakhchivan State University recently hosted a specialized training session focused on quality assurance in healthcare and medical specialties. This initiative is aimed at enhancing the competencies of future healthcare professionals in maintaining and improving quality standards in their respective fields. Key topics included:

- Principles of Quality Assurance: An overview of the fundamental principles that underpin quality assurance in healthcare, emphasizing the importance of maintaining high standards in patient care and clinical practices.
- Quality Improvement Processes: Detailed discussions on various quality improvement methodologies, including Six Sigma, Lean, and Total Quality Management (TQM), were conducted to equip students with practical tools for enhancing healthcare services.
- Patient Safety and Risk Management: Emphasis was placed on the integration of patient safety protocols within quality assurance frameworks to minimize risks and ensure optimal patient outcomes.

Nakhchivan State University is proud to be a part of the LMQ-S Erasmus+ project and remains committed to providing high-quality educational programs that prepare students to excel in their careers and contribute positively to the healthcare sector.

New Specialty in **Healthcare Management**

As part of the LMQ-S project, in which we are a partner, a new specialty in healthcare management has been established within the MBA program. This new specialty, named "Business Management (Healthcare Management)," aligns with the project's requirements and objectives. Students at Nakhchivan State University now have the opportunity to specialize in healthcare management within the MBA program, allowing them to gain the necessary skills and knowledge to excel in this critical field.

“ CONCLUSION

The LMQ-S project has facilitated significant advancements in the educational framework and practical training at Nakhchivan State University. Through initiatives like the Healthy Camp project, comprehensive risk management training, quality assurance sessions, and the introduction of a new specialty in healthcare management, the university is empowering its students to become skilled, knowledgeable, and effective healthcare professionals.
